

A webinar is simply attending your class from wherever you are! This means that you can “tune in” to your class, like watching TV except that you can interact with your trainer and your class. You will see your trainer and your trainer will see you. You will be able to learn, ask questions, and watch demonstrations.

During your Webinar, you will be advised on how you can complete your assessments, this includes:

- Accessing your assessments online (through a link)
- How and when you will be able to attend to complete you Completion Session

What is a Completion Session?

- Once you have attended your webinar and completed and submitted your online assessment you will be able to book in for your Completion Session
- A Completion Session for this course involves attending our training centre to complete any practical training and/or assessment

Other information

Depending on your course, you may also be required to participate in additional assessment (for example licence assessments). Your course information will have further information about requirements.
